 Available in 2 weeks

Expert (10+ years) Level

 Based in United Kingdom

(UTC 0 ±2) Dublin, London, Cape Town, Helsinki, Beirut ...

— ABOUT

I'm seeking Enterprise or Solution Architecture roles leaning towards the technical and modelling facets where I can work fast and create order out of chaos.

I have a developers career path - Project Manager, Developer ... Development Manager, Solution Architect, Enterprise Architect.

Motivations (according to my personality profile, rang true so I used it directly)

- Autonomy with accountability; stretch goals; ability to take control and deliver results.
- Merit-based rewards; recognition for outcomes; opportunities to improve systems and efficiency; clear targets and objectives.

=====

Enterprise Architect with Domain focus: proficient in translating strategic business objectives into deliverable, high-value technology roadmaps.

Integration and Application Focused: Strong track record in defining integration and application architecture strategies, supporting platform evolution, and balancing long-term architectural strategy against delivery priorities.

Technical Expertise: Experience modelling both enterprise and solution level architectures with a technical eye for pragmatic routes and road maps for delivery. Deep understand of software and data design skills supporting fast prototyping and discovery. API first where possible and cloud agnostic by design.

Java / Spring / Data engineer: Hands-on background in design, build, and evolution of web platforms, APIs, data layers, and integrations (Spring Boot, JPA, JDBC, SQL).

— CV SUMMARY

Skills

API Development	17 years	Data Engineering	17 years	Database Design	17 years
Java	17 years	Spring	17 years	CI/CD	7 years
Cloud Computing	7 years	D365	7 years	DevOps	7 years
Project Management	7 years	AWS	6 years	Azure	6 years
Data Governance	6 years	Enterprise architecture	6 years	Leanix	6 years
Vendor Management	6 years				

CV SUMMARY

Enterprise Architect / Enterprise Application Architect

ROBERT WALTERS PLC. Jan 2019 - Present

- Founding member of the Enterprise Architecture function to support decision making in the technology domain, business process mapping and data transformation.
- Member of initial EA cohort; defined operating model, LeanIX tooling, and ways of working with architecture, product, and delivery teams.
- Designed and implemented the enterprise architecture practice, delivered through LeanIX and ArchiMate; enabled application consolidation, demonstrable cost savings, strategy and portfolio management, and continuous architecture with project and product teams.
- Led enterprise data entity modelling in LeanIX and Data Governance, including third-party review and ratification of the canonical data model.
- Provided supplier assurance, procurement, and RFP support with technical oversight of applications, integrations, and services.
- Established an open-source API platform and governance process; created a design authority to standardise integrations and support digital transformation.

Head of Development

ROBERT WALTERS PLC. Jan 2011 - Dec 2018

- Major website platform overhaul: replatformed onto Adobe Experience Manager (AEM) with microservices on AWS; migrated operational data to PostgreSQL; rebuilt job import, user management, job push, and saved search; migrated content and refreshed SEO.
- Established programme DevOps practice: Maven-based builds and dependency management, SonarQube for static analysis and quality gates, Vagrant for consistent local/CI environments, Docker for packaging and running microservices—replacing ad hoc builds and manual deploys.
- Supported global expansion, including offshoring in Poland, India, and Manila.

Senior Developer

ROBERT WALTERS PLC. Jan 2006 - Dec 2011

- Built (and re-built) the group's websites with both minor and major revisions.
- Introduced internationalisation and localisation to the websites.
- Integration with job aggregators such as Broadbean, Conkers and SEEK.

Web Developer

ROBERT WALTERS PLC. Jan 2001 - Dec 2006

- Provided iPhone / Data APIs.
- Advert Crawler to locate and identify client adverts placed by our clients by competing recruiters.
- Intranet migration from plain HTML to Liferay: content management, publishing workflows, and user management replacing hand-maintained static sites.

EDUCATION

MSc Computing and Information Systems 1st with Distinction at University of Greenwich

Solutions Architect

Robert Walters

Dec 2018 - May 2025

I have worked with Andrew for over 20 years, with the last few reporting to me. He is very intelligent and can break things down into simple terms where needed. He is dedicated, hard working and goes above and beyond when required. I have no hesitation recommending him.

Solutions Architect

Mar 2001 - Jun 2025

It was a pleasure to work with Andrew, his ability to provide simple elegant solutions to complex problems, is something that still stays with me today. His ability to break down complex environments and distill the customers requests to actionable team deliverables has always impressed. He would be an asset to any teams that onboard in, I hope to work with him again one day in the future.
